PROFESSIONAL SUMMARY

Supply chain professional with 10+ years directing logistics, procurement, and multi-site operations across military, UN peacekeeping, and humanitarian environments — now paired with SQL, Python, and dashboard-building skills from an MS in Digital Supply Chain Management at Cal Poly Pomona. Proven record leading 300+ personnel, building automated workflows and KPI dashboards, and delivering zero-stockout, high-reliability operations in resource-constrained environments.

CORE COMPETENCIES

Supply Chain & Operations: Procurement · Demand Planning · Inventory Management · Logistics Coordination · Vendor Management · S&OP · Risk Mitigation · KPI Tracking · Process Optimization · SAP/ERP

Analytics & Data: Python (pandas, sklearn) · R · SQL · Tableau · Power BI · Excel (Advanced) · Regression Analysis · Data Visualization

AI & Technology: Machine Learning · Neural Networks · Flask · Inventory Automation · Explainable AI (XAI)

Leadership: Cross-Functional Team Leadership · Operational Planning · Project Management · Stakeholder Coordination · Negotiation

PROJECTS

Maison Aurel — AI Allocation Intelligence Platform — Solo · HTML/CSS/JavaScript · Prompt Engineering · Summer 2026

- Designed and developed an AI-powered allocation engine that scores and ranks client requests using a multi-factor weighted model, replacing manual, inconsistent decision-making with a transparent, explainable system.
- Built a custom "Fairness Score" metric to measure and balance allocation decisions across new vs. loyal customers, and applied explainable AI (XAI) principles to generate plain-language, auditable reasoning for every decision.

Telco Customer Churn Prediction — ML Pipeline — Solo · Python · sklearn · Neural Network · pandas · Spring 2026

- Built end-to-end ML pipeline for churn prediction; Youden's J calibration improved Recall from 4.1% to 59.5%, significantly improving retention-risk identification for business decision-making.

Smart Inventory Management Web Application — Solo · Python · Flask · HTML/CSS · Spring 2026

- Developed Flask-based inventory app with automated low-stock alerts and real-time dashboard — improving inventory visibility and operational response time for supply chain decision-making.

PROFESSIONAL EXPERIENCE

Operations & Logistics Manager / Company Commander · Bangladesh Army, Corps of Engineers Jul. 2021 – Nov. 2024

- Directed 300+ personnel across procurement, logistics, and multi-site operations — improved efficiency 25% through KPI dashboards and workflow optimization.
- Managed end-to-end supply chain (rations, fuel, transportation, inventory) — maintained zero stockouts over 3 years; reduced fulfillment delays 20% and procurement turnaround 40%.

Engineer Project Officer & Logistics Officer · UN Peacekeeping Deployment (MINUSMA), Kidal, Mali Feb. 2020 – Jun. 2021

- Managed supply chain and logistics for 500+ personnel in active conflict zone — reduced operational disruptions 30% and lead times 25%.
- Coordinated logistics and procurement across UN agencies, NGOs, and government partners — ensured zero mission-critical supply failures throughout deployment.

Engineering Officer, Bangladesh Army, Corps of Engineers (Jan. 2015 – Jan. 2020) — completed BS in Nuclear Science & Engineering at MIST while serving as an active-duty officer.

Quartermaster, Bangladesh Army (Jul. 2011 – Dec. 2014) — managed supply chain operations (rations, fuel, transportation, inventory), maintaining zero stockouts over 3 years.

EDUCATION, CERTIFICATIONS & AWARDS

MS, Digital Supply Chain Management · California State Polytechnic University, Pomona Expected Dec. 2026 | GPA: 3.32 / 4.0

BS, Nuclear Science & Engineering · Military Institute of Science & Technology (MIST) Jan. 2020

Certs & Awards: Lean Six Sigma Yellow Belt (2025) · UN Peacekeeping Medal (2021) · Disaster Mgmt. — US Army (2014)
